HEV Fleet Testing

2011 Honda CRZ

VIN: 2982

Fleet Testing Results To Date

Operating Statistics

Distance Driven[1]: 64,762

Average Trip Distance[2]: 8.0 mi

Stop Time with Engine Idling[2]: 85%

Trip Type City/Highway[2]: 85%/15%

Operating Performance

Cumulative MPG[1]: 35.2

See HEV America Baseline Performance and Fleet Testing Fuel Economy fact sheets for more information on vehicle specifications and fuel usage reporting, available at http://avt.inl.gov/

Test Notes

1. Calculated over the life of the vehicle based on odometer reading and fuel logs. More information available in Fleet Testing Fuel Economy sheet.
2. Calculated from electronic data logged over a subset of total miles traveled equal to 58,316 miles.
3. Fuel economy calculated for this figure using mass air flow over dynamic vehicle operation.
4. Calculated from battery power data logged over a subset of total miles traveled, equal to 54,318 miles.
