

Mileage Accumulation and Fuel Economy 2015 Chevrolet Spark BEV - September 2016

Four model year 2015 Chevrolet Spark battery electric vehicles (BEVs) entered Accelerated Testing during January 2015 in a fleet in Arizona. Each Spark will be operated for 36,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2015 Chevrolet Spark BEVs have been driven a total of 49,994 miles. The cumulative average electricity consumption is 288.7 AC Wh/mile. Monthly electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
