

Mileage Accumulation and Fuel Economy 2015 Mercedes B-Class BEV - September 2016

Four model year 2015 Mercedes B-Class battery electric vehicles (BEVs) entered Accelerated Testing during June 2015 in a fleet in Arizona. Each B-Class will be operated for 36,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2015 Mercedes B-Class BEVs have been driven a total of 50,666 miles. The cumulative average electricity consumption is 394.6 AC Wh/mile. Monthly electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
