

Mileage Accumulation and Fuel Economy 2015 Honda Accord HEV - September 2016

Four model year 2015 Honda Accord hybrid electric vehicles (HEVs) entered Accelerated Testing - one during February 2015 and the other three during March 2015 in a fleet in Arizona. Each Accord will be operated for 195,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2015 Honda Accord HEVs have been driven a total of 377,150 miles. The cumulative average fuel economy is 37.8 mpg. Monthly gasoline consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
