

Model Year 2006 Honda Civic Hybrid Electric Vehicle Accelerated Testing – January 2009

Two model year 2006 (Gen II) Honda Civic hybrid electric vehicles (HEVs) entered Accelerated testing during July 2006 in a fleet in Arizona. After reaching 160,000 miles each, the two Civic HEVs had their traction batteries tested before being retired. One page vehicle fact sheets and maintenance logs have been posted for the HEVs on nearby www pages. The information includes: miles driven, fuel economy, operations and maintenance requirements, operating costs, and life-cycle costs. The two Gen II Civic HEVs were driven a total of 321,542 miles and the cumulative average fuel economy was 39.1 mpg when testing ended in November 2008.
