

Toyota Highlander Hybrid Electric Vehicle Accelerated Testing – January 2009

Two Toyota Highlander all-wheel drive hybrid electric vehicles (HEVs) entered Accelerated testing in a fleet in Arizona during October 2005. After reaching 160,000 miles each, the two Highlanders will have their traction batteries tested before they are retired. One page vehicle fact sheets and maintenance logs have been posted on nearby www pages. The information includes miles driven, fuel economy, operations and maintenance requirements, operating costs, and life-cycle costs. The two Highlanders have been driven a total of 320,541 miles and the cumulative average fuel economy was 24.4 mpg at the end of testing.
