

## Volkswagen Golf Micro Hybrid Vehicle Accelerated Testing - December 2012

Two Volkswagen Golf European Micro Hybrid Vehicle (MHVs) entered accelerated testing during October 2010 in a fleet in Arizona. One-page vehicle maintenance logs will be posted on nearby www pages. This information will include the date and mileage for all maintenance and repairs performed on the vehicles. The Golf MHVs have been driven a total of 219,178 miles and the cumulative average fuel economy is 43.2 mpg. Note that initial mileage accumulation was slow and mpg results were low due to baseline performance and battery testing.
