

Mileage Accumulation and Fuel Economy 2013 Ford Fusion Energi PHEV - September 2016

Four model year 2013 Ford Fusion Energi plug-in hybrid electric vehicles (PHEVs) entered Accelerated Testing - one during December 2013 and the other three during January 2014 in a fleet in Arizona. Each Fusion Energi will be operated for 160,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2013 Ford Fusion Energi PHEVs have been driven a total of 561,647 miles. The cumulative average fuel economy is 38.4 mpg and the cumulative average electricity consumption is 24.5 AC Wh/mile. Monthly gasoline and electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
