

Mileage Accumulation and Fuel Economy 2014 BMW i3 REX PHEV - September 2016

Four model year 2014 BMW i3 REX plug-in hybrid electric vehicles (PHEVs) entered Accelerated Testing - one during October 2014 and the other three during November 2014 in a fleet in Arizona. Each i3 Rex will be operated for 36,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2014 BMW i3 REX PHEVs have been driven a total of 104,548 miles. The cumulative average fuel economy is 103.7 mpg and the cumulative average electricity consumption is 219.1 AC Wh/mile. Monthly gasoline and electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
