

Mileage Accumulation and Fuel Economy 2016 Chevrolet Volt EREV - September 2016

Four model year 2016 Chevrolet Volt extended range electric vehicles (EREVs) entered Accelerated Testing - two during December 2015 and the other two during January 2016 in a fleet in Arizona. Each Volt will be operated for 160,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby [www](#) pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2016 Chevrolet Volt EREVs have been driven a total of 106,162 miles. The cumulative average fuel economy is 63.7 mpg and the cumulative average electricity consumption is 40.8 AC Wh/mile. Monthly gasoline and electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
