

### Toyota Prius PHEV Accelerated Testing – March 2014

Four model year 2013 Toyota Prius plug-in hybrid electric vehicles (PHEVs) entered Accelerated testing during March 2013 in a fleet in Arizona. Each Prius PHEV will be operated for 195,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2013 Toyota Prius PHEVs have been driven a total of 192,377 miles. Monthly gasoline and electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
